edgepool

One trader.
One pool.
Automated edge.

Non-custodial Solana pools copy-trading performance-ranked Fomo traders.

Colosseum submission Prototype stage

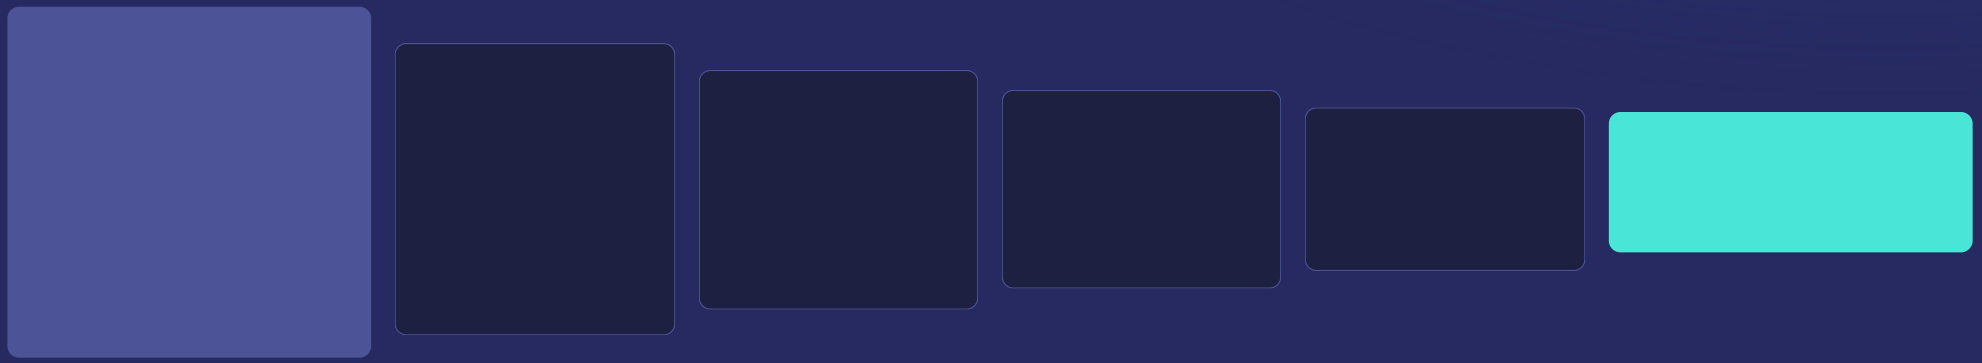

The signal is public. Capturing it is not.

- Late entries
- DIY infrastructure
- 24/7 Screen time
- Emotional execution

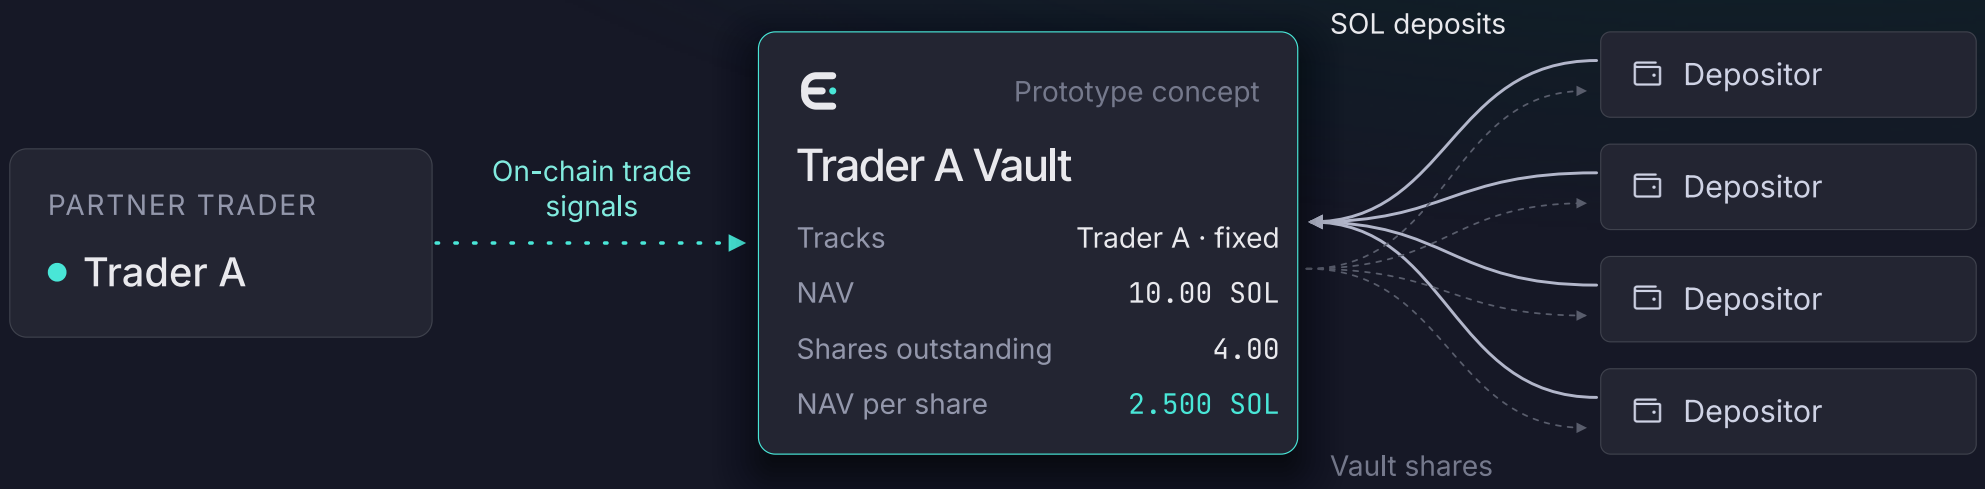

Trader PnL is not copyable PnL.

What matters is what followers can capture after latency, liquidity, fees and risk checks.

Edgepool ranks traders by reproducible performance, not headline profit alone.

Each ranked trader powers a dedicated investable vault.

Shared execution Shared risk rules Pro-rata ownership

MVP Single-trader vaults —— Later Multi-trader baskets

Every depositor owns a proportional share of the same strategy.

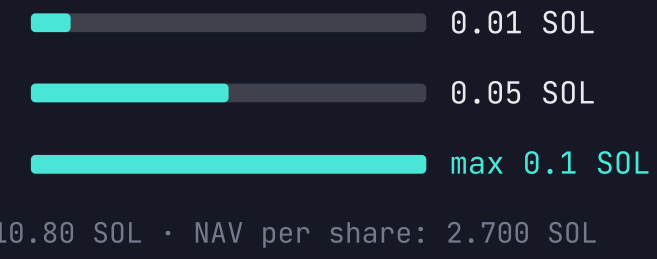

$$\text{Share price} = \frac{\text{Vault NAV}}{\text{Shares outstanding}}$$

SOL Only accounting and settlement asset

USDC Display estimate only

Flows settle at flat or checkpoint

$$\text{Trade size} = \min(1\%\ \text{vault NAV},\ 0.1\ \text{SOL},\ \text{liquidity cap})$$

Net vault NAV: 10.80 SOL · NAV per share: 2.700 SOL

Max 10 open positions · Max 10% total exposure

0.1 SOL is the maximum, not a fixed trade size.

From trader signal to managed position.

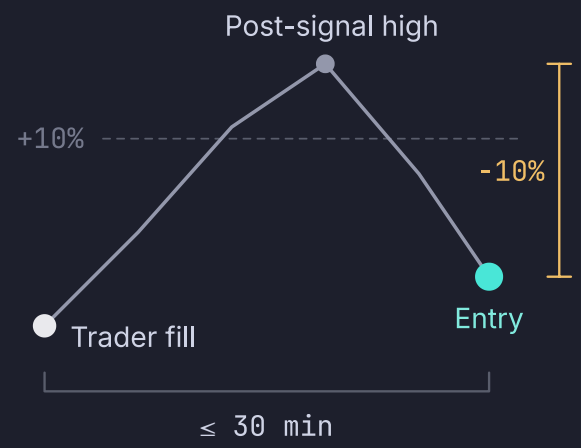

● Built in prototype ○ Being validated

Size first. Stop losses second. Profits third.

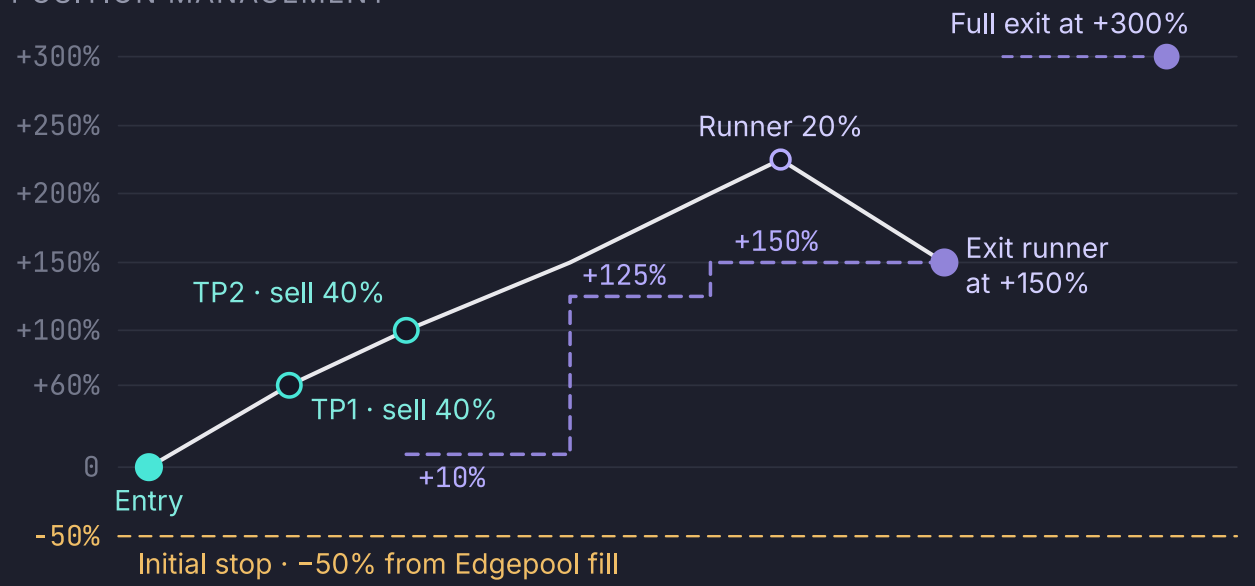

Initial strategy settings under validation

ENTRY TRIGGER

No momentum or pullback within 30 min → Skip

POSITION MANAGEMENT

After TP2, every +50% gain locks another +25% · full exit at +300%

A stop is a trigger, not a guaranteed fill in volatile markets.

Full exit if

- Trader exits >50% position
- Liquidity pulled or unlocked
- RugCheck worsens
- Execution route lost
- Price impact over limit

Start with traders whose performance survives being copied.

Traders become both strategy providers and distribution partners.

20% of new net profit above high-water mark

No management fee

80% depositors · 15% partner trader · 5% Edgepool

`10.00 SOL × 10% = 1.00 SOL new profit`

Illustrative, not a forecast

0.80 SOL	0.15 SOL	0.05 SOL
Depositors	Partner trader	Edgepool

Performance fees apply only to new profit above the previous high-water mark.

Launch narrow. Validate execution. Expand into baskets.

NOW · PROTOTYPE

- Trader tracking
- Portfolio monitoring
- RugCheck integration
- Copy execution

NEXT · SINGLE-TRADER LAUNCH

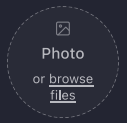

- Vault-share accounting
- Position-sizing validation
- Partner trader onboarding
- Live fill and tracking data

LATER · MULTI-TRADER

- 24h, 3d, 7d baskets
- Consensus entry and exit
- User-created trader vaults
- Mobile distribution

TRACTION

Prototype. No public users, deposits, revenue or live performance claimed.
